

POLICY NO. 433

WORK PERFORMED ON CONSUMER'S PROPERTY

I. OBJECTIVE

The employees of PCRPPD frequently go beyond their normal duties to serve consumers effectively. However, in order to serve consumers equally and economically, PCRPPD must have guidelines for these services.

II. PROVISIONS

1. PCRPPD's responsibility stops at the meter and any wires poles, towers or fixtures beyond the meter are the responsibility of the customer. This does not apply to surge protection and other equipment owned and or maintained by PCRPPD. Occasionally it may be necessary to provide work beyond the meter to assist a customer in restoring service after equipment has been damaged or destroyed.
2. In cases where employees of PCRPPD are engaged in work on consumer-owned wires or equipment, the customer will be charged according to current labor, fleet and equipment rates. Such rates will be calculated annually, or more frequently as needed, and attached as an addendum to this policy. All charges will be a minimum of one hour.
3. Qualified servicemen may, if they are working on a Consumers property, inspect major electrical equipment if the consumer requests and make simple adjustments. Repairs other than simple adjustments will need to be done by a qualified electrician at the customer's expense.
4. It shall be the policy of PCRPPD to require complete repair on consumer owned equipment when the equipment has caused or may cause damage or loss to PCRPPD or poses a danger to the public. Complete repair shall be according to any applicable code and may involve rewiring, tree cutting or trimming, or the addition or repair of equipment. Failure to promptly repair dangerous situations called to the consumer's attention may result in disconnection of the service until repairs to code are complete.

III. RESPONSIBILITY

The General Manager and staff shall be responsible for the administration of this policy.
