

POLICY NO. 430

LINE EXTENSION AND CONDITIONS OF SERVICE FOR IRRIGATION

I. OBJECTIVE

The PCRPPD will construct proposed extensions for irrigation service and the Applicant or Owner will make a contribution in "Aid to Construction" payable in advance of construction.

II. PROVISIONS

1. For all new construction after September 8, 2013 "Aid to Construction" will be billed in two parts, the first will be a nonrefundable Initiating Contribution in Aid to Construction (ICIA) and due before the service is initiated, along with a contract for service, the second part will be billed at completion of construction as follows:

Payable upon Service Initialization;

- | | | |
|----|---------------------------------|--------------------------|
| a. | Single phase Nonrefundable ICIA | \$750.00 (per service) |
| b. | Three phase Nonrefundable ICIA | \$1,750.00 (per service) |

Payable upon completion of construction;

- | | | |
|----|--------------|--------------------------|
| a. | Single phase | \$1,000.00 (per service) |
| b. | Three phase | \$65.00 (Per Hp) |

The nameplate Horsepower of the motor will be used to determine the "Aid to Construction".

With the above "Aid to Construction", PCRPPD will furnish all material and labor to construct overhead lines to the safest and most practical point nearest the landowner's property. All construction beyond the county right-of-way will be the responsibility of the customer. Changes after construction is complete will be treated as stated in Paragraph 2 or 4.

2. When adding horsepower to existing service that are older than five years and that PCRPPD must make changes from single phase to three phase, change the transformer and/or meter loop capacity, the "Aid to Construction" will be one of the following:
 - a. Single phase to three phase \$1,750 plus \$25.00 per added horsepower.
 - b. Single phase to three phase requiring conversion of distribution line more than 300' \$1750.00 plus \$65.00 per added horsepower.
 - c. Transformer changes \$25.00 per added horsepower.

- d. Transformer changes, voltage up rates \$500.00 per installation
3. When a customer requests service that is outside of the PCRPPD service area the following conditions must be met:
 - a. The land must be adjacent to the service area boundary or adjacent to a service that has been waived previously.
 - b. The customer must provide the PCRPPD with a "Consent and Waiver form from the "Certified" service provider.
 - c. The "Aid to construction" shall be 1.5 (one and one half) times the rate for services in the certified service area.
 4. When adding horsepower to an existing service that is less than five years old, the contribution will be the greater of the above costs or the increased horsepower added to the original new construction contribution.

Payment of the-"Aid to Construction", shall be made to PCRPPD prior to any construction.

All line extensions exceeding \$50,000.00 will be approved by the board of directors before construction is begun.

The customer shall furnish, install, and maintain all poles, wires, and equipment installed beyond the point of delivery, which shall be defined as all equipment on the load side of the meter.

PCRPPD will furnish single phase or three phase at available secondary voltages. Motors having a rated capacity less than fifteen horsepower will be connected single phase.

All motors over 10 hp will be installed with an appropriately sized capacitor. Accounts that do not comply with Section 10 of the "Irrigation Agreement for Electric Service" and do not have secondary capacitors installed will be billed \$2.50 per billable horsepower as a penalty. Such penalty will be billed each irrigation season that the capacitors are not installed.

On existing installations, where a consumer wants the existing line removed and replaced with underground, the existing line will be removed at no cost to the consumer and the consumer will be responsible for the entire cost of the underground, fuse boxes, and switches.

The applicant will be responsible for removal of all trees and brush that will hinder construction or operation on property that he owns, leases or rents, prior to construction.

For new irrigation service requests in years, 2021 and 2022 PCRPPD will waive the contribution charges for the first 12 services in each year which will enroll in and remain on a 6 ½-day control rate for five consecutive years. Qualifying services must be 30 hp or larger and require no more than 1,500 feet of construction. Services wishing to reduce control rate before the required five years have expired must first pay the full amount of the contribution that was waived. Services located outside of PCRPPD service territory will not qualify for this waiver. This offer will be limited to one service per customer per year unless otherwise directed by the General Manager.

III. RESPONSIBILITY

The General Manager shall be responsible for the administration of this policy.
