Energy Charge

Amount of kWh used at your location multiplied by the cost per kWh of your assigned rate schedule. This charge is to recover costs based on the amount of electricity used at your location.

Customer Charge

Flat monthly charge that covers fixed cost, for providing electricity to your location.

Demand Charge

This is a fixed charge based on the size of your transformer required for your service. This charge is to recover costs based on the size of your service.

Sales Tax

State Sales Tax that is calculated from the sum of Energy, Customer and Demand charges.

- 1 Account Number** A number assigned to your specific service. Each service has a unique number.
- 2 Meter Number** A number assigned to your meter at this location. Each meter has a unique number.
- 3 Service Description** Contains the address of service or something to identify if the service doesn't have an address
- 4 Bill From/ Bill To** Date range for billing period
- 5 # Days** Days in billing period
- 6 Cycle** Used internally by PCRPPD to identify accounts by type & location.
- 7 Previous Reading** Reading obtained from the meter at the beginning of the billing period
- 8 Present Reading** Reading obtained from the meter at the end of the billing period.
- 9 Meter Multiplier** Used to calculate usage. This value is typically 1.0 unless the service is large. 1.0 means for every kWh the meter recorded, 1 kWh is billed.
- 10 kWh** Amount of kWh recorded for the period. The Previous reading is subtracted from the Present Reading and then multiplied by the Meter Multiplier.
- 11 kW** Highest demand value recorded by the meter during the billing period
- 12 Rate / Ref** Rate Schedule used to calculate the billing.
